2026 Ambassador Laurel: Wants to Send Kids' Cancer Packing

We're helping to raise money for childhood cancer research

Laurel "Squirrel" was diagnosed with ALL on September 1st, 2022 and was moved to the high-risk category after she failed to achieve remission at 29 days. She spent over 100 days in the hospital for various complications. Laurel finally achieved remission and is continuing the remainder of her COG trial treatment plan. Our hope is that she'll avoid relapse and that we can minimize late effects. But the reality is that remission is just the start of a lifetime of enduring consequences of the cancer and current forms of treatment. Laurel's family is motivated to advocate for better prevention and treatment so that other parents don't have to deal with the harsh realities of childhood cancer.

The St. Baldrick's Foundation is a volunteer and donor powered charity committed to supporting the most promising research to find cures for childhood cancers and give survivors long and healthy lives.

Laurel A.
